

Nama: Fabyan Yastika Permana
Kelas: A
NIM: 242410101041

□ **AKTIVITAS MANDIRI 5 — CRUD Lengkap Mahasiswa**

1. Buat Resource Controller: `php artisan make:controller MahasiswaController --resource --model=Mahasiswa`
2. Daftarkan di `routes/web.php`: `Route::resource('mahasiswa', MahasiswaController::class)`
3. Buat semua view: `mahasiswa/index.blade.php` (tabel + pagination), `create.blade.php` (form), `edit.blade.php` (form pre-filled), `show.blade.php` (detail)
4. Implementasi method `index()` — ambil semua mahasiswa dengan `paginate(10)` dan tampilkan ke view
5. Implementasi `create()` dan `store()` — dengan validasi `nim (unique)`, `nama (min:3)`, `email (email|unique)`, `jurusan (in:SI,TI,MI)`
6. Implementasi `edit()` dan `update()` — tampilkan form dengan `old()` atau `$mahasiswa->field`, validasi `unique` kecuali `ID` ini
7. Implementasi `destroy()` — dengan konfirmasi JavaScript sebelum hapus
8. Tambahkan flash message di layout dan tampilkan `session('success')` / `session('error')`
9. BONUS: Tambahkan fitur upload foto profil dengan validasi `image|mimes:jpg,png|max:2048`

□ *Tips: Gunakan Route Model Binding (Mahasiswa \$mahasiswa sebagai parameter method) agar Laravel otomatis query `findOrFail`. Lebih bersih dari `Mahasiswa::findOrFail($id)` manual.*

AKTIVITAS MANDIRI 5 — CRUD Lengkap Mahasiswa

1. Buat Resource Controller: `php artisan make:controller MahasiswaController --resource --model=Mahasiswa`

Saya menyesuaikan dengan project saya yaitu manajemen mahasiswa dengan mengambil data dari model Mahasiswa

```
D:\PWEB-KULIAH\LARAVEL>php artisan make:controller ManajemenMahasiswa --resource --model=Mahasiswa

A App\Models\Mahasiswa model does not exist. Do you want to generate it? (yes/no) [yes]
> yes

[INFO] Model [D:\PWEB-KULIAH\LARAVEL\app\Models\Mahasiswa.php] created successfully.

[INFO] Controller [D:\PWEB-KULIAH\LARAVEL\app\Http\Controllers\ManajemenMahasiswa.php] created successfully.
```

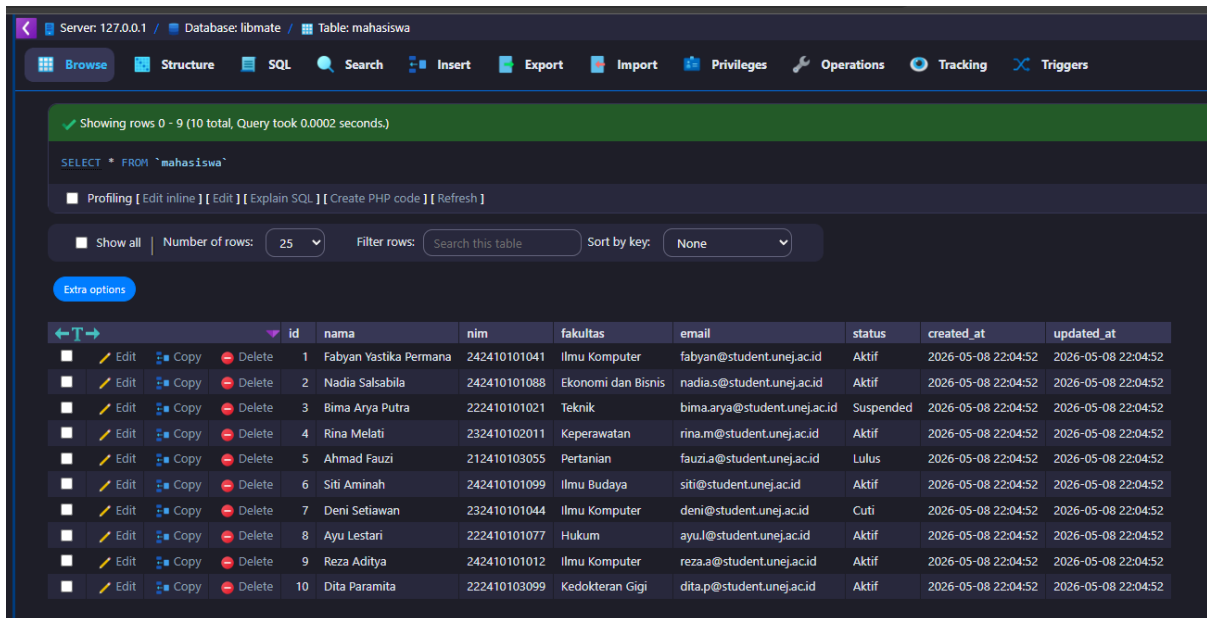

2. Daftarkan di `routes/web.php`: `Route::resource('mahasiswa', MahasiswaController::class)`

Saya mendaftarkan route `/manajemen-mahasiswa` karena ingin custom url agar sesuai dengan tema website saya

```
web.php | index.blade.php
routes > web.php > ...
22
23 Route::get('/kontak', function () {
24     return view('kontak');
25 })->name('kontak');
26
27
28 Route::get('/ruangan/{lantai}/{id}', [TentangController::class, 'show'])->name('ruangan.show');
29
30 Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b)->name('hitung');
31
32 // Manajemen ruang
33 Route::get('/manajemen-ruang', [ManajemenRuang::class, 'index'])->name('manajemen-ruang');
34
35 // Manajemen mahasiswa
36 Route::get('/manajemen-mahasiswa', [ManajemenMahasiswa::class, 'index'])->name('manajemen-mahasiswa');
37
```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)

Pertama, saya membuat tabel mahasiswa dahulu untuk menampung data

Server: 127.0.0.1 / Database: libmate / Table: mahasiswa

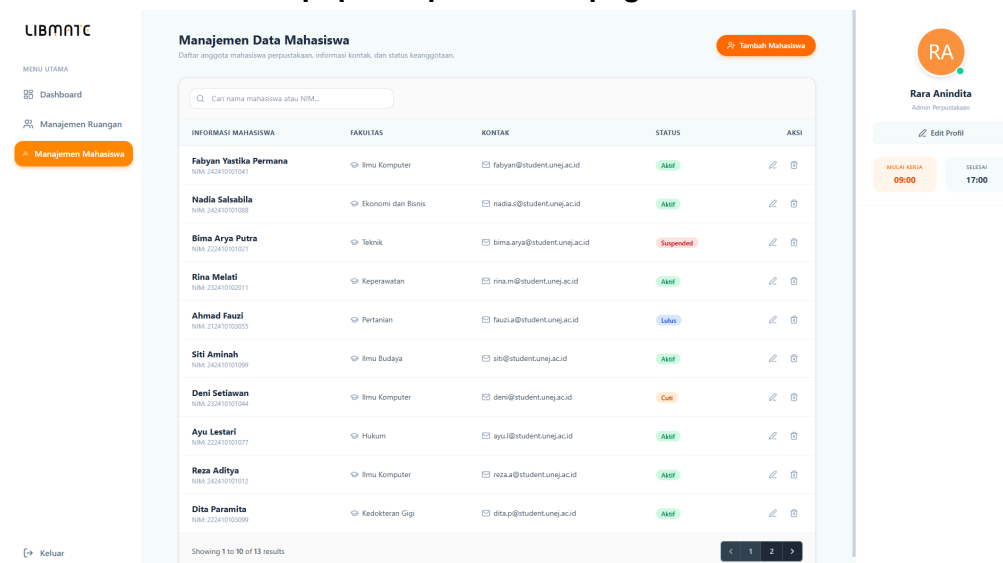

Showing rows 0 - 9 (10 total, Query took 0.0002 seconds.)

SELECT * FROM `mahasiswa`

Number of rows: 25 | Filter rows: Search this table | Sort by key: None

	id	nama	nim	fakultas	email	status	created_at	updated_at

Halaman create.blade.php (form):

Halaman edit.blade.php (form pre-filled):

Halaman show.blade.php (detail):

4. Implementasi method index() — ambil semua mahasiswa dengan paginate(10) dan tampilkan ke view

Controller:

```
index.blade.php  ManajemenMahasiswa.php X
app > Http > Controllers > ManajemenMahasiswa.php > ManajemenMahasiswa > index
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use App\Models\Mahasiswa;
6  use Illuminate\Http\Request;
7
8  class ManajemenMahasiswa extends Controller
9  {
10     /**
11      * Display a listing of the resource.
12      */
13     public function index(Request $request)
14     {
15         $search = $request->input('search');
16
17         $mahasiswa = Mahasiswa::when($search, function ($query, $search) {
18             return $query->where('nama', 'like', "%{$search}%")
19                 ->orWhere('nim', 'like', "%{$search}%");
20         })->paginate(10);
21
22         $mahasiswa->append(['search' => $search]);
23
24         return view('dashboard.manajemen-mahasiswa.index', compact('mahasiswa', 'search'));
25     }
26     /**
```

Halaman index manajemen mahasiswa dengan paginate(10):

5. Implementasi create() dan store() — dengan validasi nim (unique), nama (min:3), email (email|unique), jurusan (in:SI, TI, MI)

Saya menggunakan fakultas dan menyesuaikan dengan proyek saya dan menyesuaikan requirement pembatasan lainnya:

```
edit.blade.php 8  ManajemenMahasiswa.php X
app > Http > Controllers > ManajemenMahasiswa.php > ManajemenMahasiswa > store
27  * Show the form for creating a new resource.
28  */
29  public function create()
30  {
31      return view('dashboard.manajemen-mahasiswa.create');
32  }
33
34  /**
35   * Store a newly created resource in storage.
36   */
37  public function store(Request $request)
38  {
39      $validated = $request->validate([
40          'nama' => 'required|string|max:150',
41          'nim' => 'required|string|max:20|min:10|unique:mahasiswa,nim',
42          'fakultas' => 'required|string|max:100',
43          'email' => 'required|email|max:150|unique:mahasiswa,email',
44          'status' => 'required|in:Aktif,Suspended,Cuti,Lulus',
45      ]);
46
47      Mahasiswa::create($validated);
48
49      return redirect()->route('manajemen-mahasiswa')
50          ->with('success', 'Data mahasiswa berhasil ditambahkan.');
```

Tambah Mahasiswa Baru

Lengkapi formulir di bawah untuk mendaftarkan mahasiswa ke sistem perpustakaan.

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

Saya menerapkan validasi sesuai dengan proyek yang saya buat dan pastinya kecuali ID dari pengguna yang tervalidasi dengan NIIM & email:

```
editblade.php 8  ManajemenMahasiswa.php X
app > Http > Controllers > ManajemenMahasiswa.php > ManajemenMahasiswa > update
59     }
60
61     /**
62      * Show the form for editing the specified resource.
63      */
64     public function edit(Mahasiswa $mahasiswa)
65     {
66         return view('dashboard.manajemen-mahasiswa.edit', compact('mahasiswa'));
67     }
68
69     /**
70      * Memproses pembaruan data ke database.
71      */
72     public function update(Request $request, Mahasiswa $mahasiswa)
73     {
74         $validated = $request->validate([
75             'nama' => 'required|string|max:150',
76             'nim' => 'required|string|max:20|min:10|unique:mahasiswa,nim,' . $mahasiswa->id,
77             'fakultas' => 'required|string|max:100',
78             'email' => 'required|email|max:150|unique:mahasiswa,email,' . $mahasiswa->id,
79             'status' => 'required|in:Aktif,Suspended,Cuti,Lulus',
80         ]);
81
82         $mahasiswa->update($validated);
83
84         return redirect()->route('manajemen-mahasiswa')
85             ->with('success', 'Data mahasiswa berhasil diperbarui.');
```

Edit Profil Mahasiswa

Perbarui informasi keanggotaan untuk **Fabyan Yastika Permana**.

7. Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus

```
141 <td class="px-6 py-4 text-right">
142     <div class="flex justify-end gap-2">
143         <a href="{{ route('manajemen-mahasiswa.show', $mhs->id) }}"
144             class="p-2 text-slate-400 hover:text-slate-900 hover:bg-slate-50 rounded-lg transition">
145             <i data-lucide="eye" class="w-4 h-4"></i>
146         </a>
147         <a href="{{ route('manajemen-mahasiswa.edit', $mhs->id) }}"
148             class="p-2 text-slate-400 hover:text-orange-500 hover:bg-orange-50 rounded-lg transition">
149             <i data-lucide="edit-3" class="w-4 h-4"></i>
150         </a>
151         <form action="{{ route('manajemen-mahasiswa.destroy', $mhs->id) }}"
152             method="POST"
153             onsubmit="return confirm('Apakah Anda yakin ingin menghapus data mahasiswa ini?');">
154             @csrf
155             @method('DELETE')
156             <button type="submit"
157                 class="p-2 text-slate-400 hover:text-red-500 hover:bg-red-50 rounded-lg transition">
158                 <i data-lucide="trash-2" class="w-4 h-4"></i>
159             </button>
160         </form>
161     </div>
162 </td>
163 </tr>
```

8. Tambahkan flash message di layout dan tampilkan session('success') / session('error')

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image|mimes:jpg,png|max:2048

AKTIVITAS MANDIRI 6 — Middleware & Autentikasi

□ AKTIVITAS MANDIRI 6 — Middleware & Autentikasi

1. Instal Laravel Breeze: composer require laravel/breeze --dev, kemudian php artisan breeze:install blade
2. Jalankan php artisan migrate untuk membuat tabel users
3. Jalankan npm install && npm run dev untuk build assets
4. Coba register dan login di <http://127.0.0.1:8000/register>
5. Amankan semua route mahasiswa dengan middleware auth: Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)
6. Coba akses /mahasiswa tanpa login — pastikan redirected ke halaman login
7. Tambahkan nama user di navbar: {{ auth()->user()->name }}
8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu
9. BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login

□ *Tips: Setelah Breeze terinstal, semua file autentikasi ada di resources/views/auth/. Anda bebas modifikasi tampilannya sesuai kebutuhan.*

1. Instal Laravel Breeze: composer require laravel/breeze --dev, kemudian php artisan breeze:install blade

```
D:\PWEB-KULIAH\LARAVEL> composer require laravel/breeze --dev

5. Amankan semua route mahasiswa dengan middleware auth:
Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

```
ManajemenMahasiswa.php | bootstrapjs | web.php X
routes > web.php > ...
6 use App\Http\Controllers\ManajemenRuang;
7 use App\Http\Controllers\TentangController;
8
9 Route::get('/', function () {
10     return view('welcome');
11 });
12
13 Route::get('/dashboard', function () {
14     return view('dashboard');
15 })->middleware(['auth', 'verified'])->name('dashboard');
16
17 Route::middleware('auth')->group(function () {
18     Route::get('/profile', [ProfileController::class, 'edit'])->name('profile.edit');
19     Route::patch('/profile', [ProfileController::class, 'update'])->name('profile.update');
20     Route::delete('/profile', [ProfileController::class, 'destroy'])->name('profile.destroy');
21 });
22
23 Route::get('/', function () {
24     return view('welcome');
25 });
26
27 Route::get('/dashboard', function () {
28     session()->flash('success', 'Selamat datang kembali! Dashboard berhasil dimuat. ✨');
29
30     return view('dashboard');
31 })->name('dashboard');
32
33
34 Route::get('/tentang', [TentangController::class, 'index'])->name('tentang');
35 Route::get('/tentang/ruangan/{lantai}/{kapasitas}', [TentangController::class, 'filterRuangan']);
36
37 Route::get('/kontak', function () {
38     return view('kontak');
39 })->name('kontak');
40
41
42 Route::get('/ruangan/{lantai}/{id}', [TentangController::class, 'show'])->name('ruangan.show');
43
44 Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b)->name('hitung');
45
46 // Manajemen ruang
47 Route::get('/manajemen-ruang', [ManajemenRuang::class, 'index'])->name('manajemen-ruang');
48
49 // Manajemen mahasiswa
50 Route::get('/manajemen-mahasiswa', [ManajemenMahasiswa::class, 'index'])->name('manajemen-mahasiswa');
```

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

Ketika klik enter. dikembalikan ke halaman login:

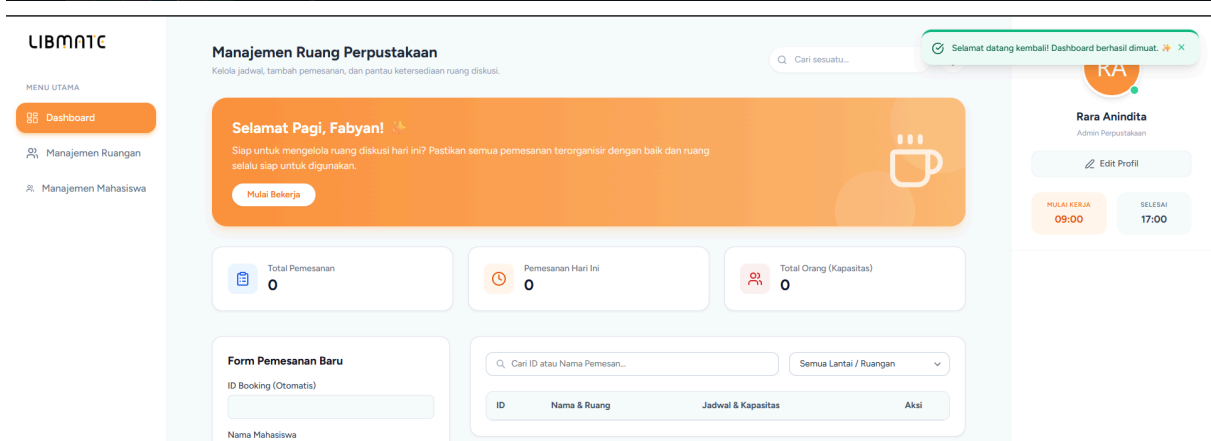

7. Tambahkan nama user di navbar: {{ auth()->user()->name }}

Saya tambahkan di header sesuai projek:

```

27
28
29
30
31
32
33
34
35
36
37
38
39
40
41
42
43
44
45
46
47

```

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

```
D:\PWEB-KULIAH\LARAVEL>php artisan make:middleware CekAdmin
```

```
INFO Middleware [D:\PWEB-KULIAH\LARAVEL\app\Http\Middleware\CekAdmin.php] created successfully.
```

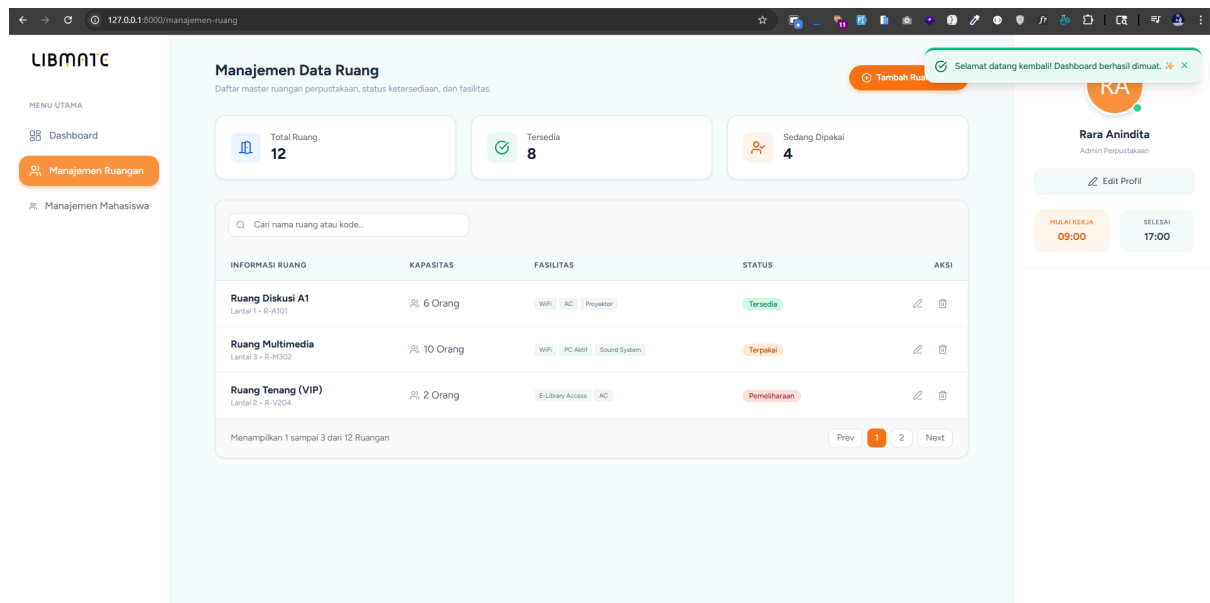

```
CekAdmin.php X web.php app.php
app > Http > Middleware > CekAdmin.php > CekAdmin > handle
1  <?php
2
3  namespace App\Http\Middleware;
4
5  use Closure;
6  use Illuminate\Http\Request;
7  use Symfony\Component\HttpFoundation\Response;
8  use Illuminate\Support\Facades\Auth;
9  class CekAdmin
10 {
11     /**
12      * Handle an incoming request.
13      *
14      * @param Closure(Request): (Response) $next
15      */
16     public function handle(Request $request, Closure $next): Response
17     {
18         if (Auth::check() && Auth::user()->role === 'admin') {
19             return $next($request);
20         }
21
22         abort(403, 'Akses Ditolak! Halaman ini hanya untuk Administrator.');
```

Kemudian didaftarkan di bootstrap/app.php:

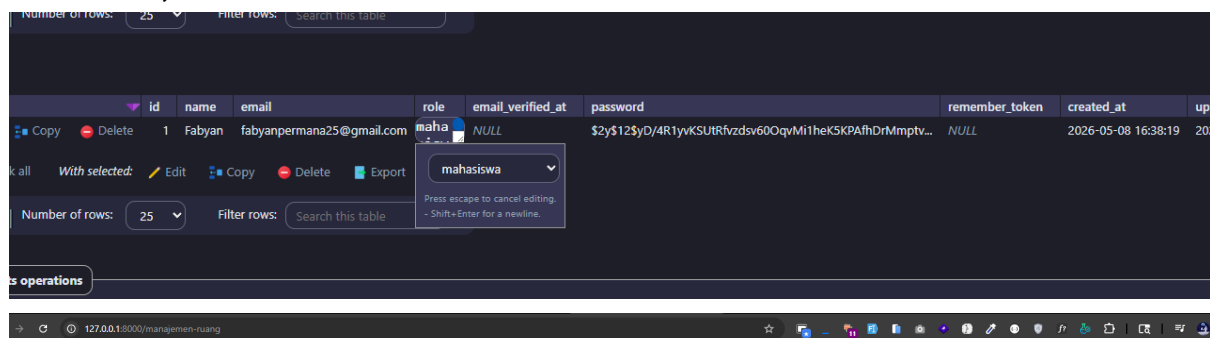

```
CekAdmin.php web.php app.php X
bootstrap > app.php > Closure
1  <?php
2
3  use Illuminate\Foundation\Application;
4  use Illuminate\Foundation\Configuration\Exceptions;
5  use Illuminate\Foundation\Configuration\Middleware;
6
7  return Application::configure(basePath: dirname(__DIR__))
8      ->withRouting(
9          web: __DIR__ . '/../routes/web.php',
10         commands: __DIR__ . '/../routes/console.php',
11         health: '/up',
12     )
13     ->withMiddleware(function (Middleware $middleware): void {
14         $middleware->alias([
15             'cek.admin' => \App\Http\Middleware\CekAdmin::class,
16         ]);
17     })
18     ->withExceptions(function (Exceptions $exceptions): void {
19         //
20     })->create();
21
```

Lalu saya mencoba middleware dengan halaman manajemen ruang:

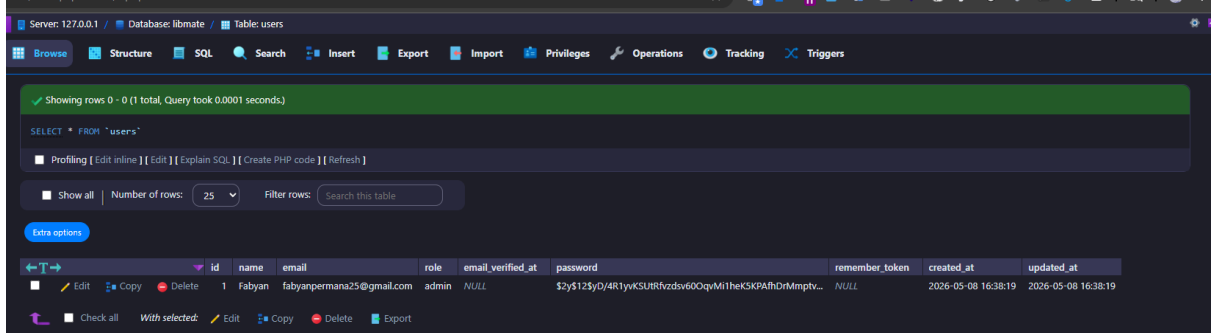

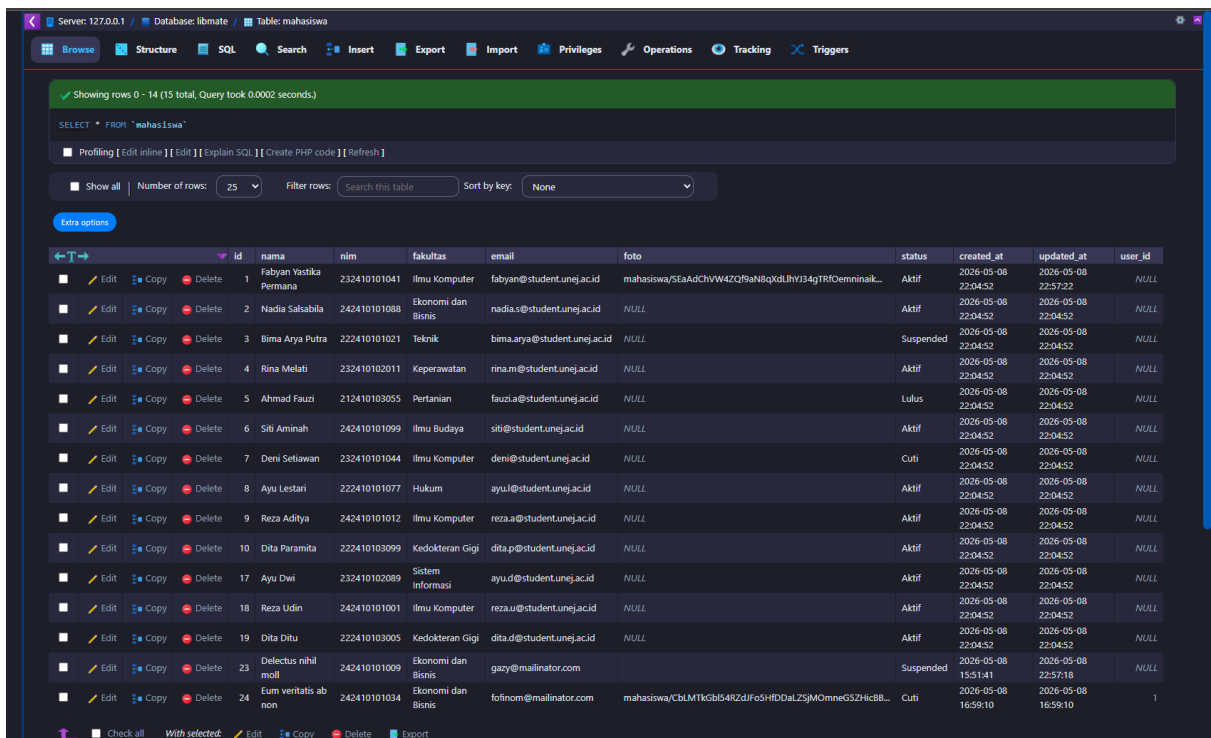

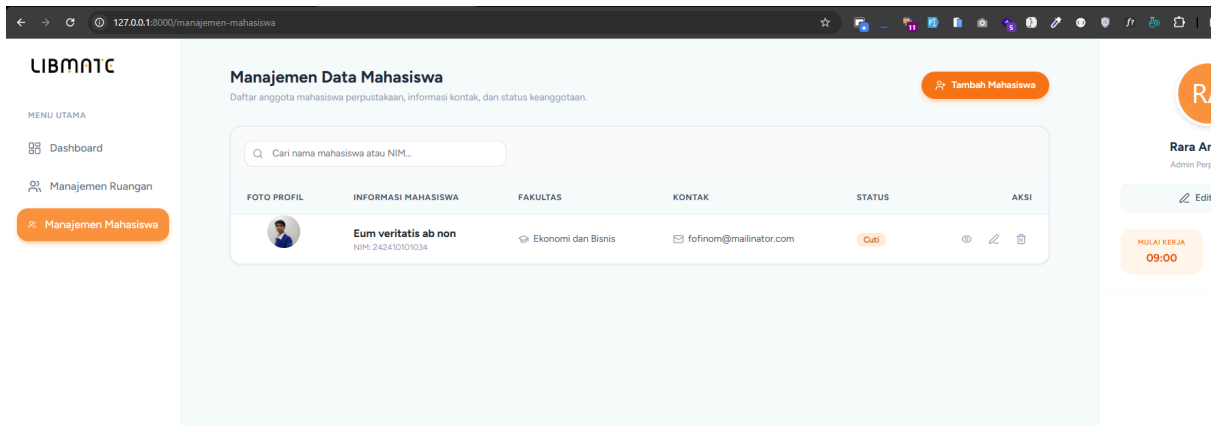

```
Route::middleware(['auth', 'cek.admin'])->group(function () {
    // Manajemen ruang
    Route::get('/manajemen-ruang', [ManajemenRuang::class, 'index'])->name('manajemen-ruang');
});
```

Itu berhasil karena role admin yang saya gunakan. Dan ketika saya ganti menjadi role mahasiswa, maka tidak bisa dibuka:

9. BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login
 Ini adalah hanya data yang ditambahkan oleh user “admin” yang sedang login:

Memiliki relasi dengan kolom user_id

```
index.blade.php 2026_05_08_165615_add_user_id_to_mahasiswa_table.php X ManajemenMahasiswa.php 2 Mahasiswa.php
database > migrations > 2026_05_08_165615_add_user_id_to_mahasiswa_table.php > class > up > Closure
1 <?php
2
3 use Illuminate\Database\Migrations\Migration;
4 use Illuminate\Database\Schema\Blueprint;
5 use Illuminate\Support\Facades\Schema;
6
7 return new class extends Migration
8 {
9     /**
10      * Run the migrations.
